Notes: Pre-1989/90 lettings figures are Department of the Environment estimates. New housing association tenants include former council tenants transferring to a housing association letting. However, they exclude former supported housing tenants taking up a general needs tenancy.

Stock figures are for December for years up to 1989/90 and subsequently for the start of the financial year (consistent with UKHR Table 17a). Lettings to the homeless do not include lettings on non-secure tenancies for which no breakdown is available.

Lettings figures are for general needs and do not include supported housing. The definition of supported housing changed for 2004/05, reducing the number of lettings defined as general needs.
