Sources: ONS New Earnings Surveys (resident basis) and Annual Survey of Hours and Earnings.

Notes: 1. The earnings estimates are inclusive of overtime and are based on the earnings in pounds for employees who are on adult rates of pay and whose pay was not affected by absence.

2. There were changes of methodology in 2004, 2006 and 2011, which all slightly reduced average earnings figures compared to the previous years.

3. Figures to 1995 are from the New Earnings Survey, and for Great Britain only. Figures from 2000 are from the Annual Survey of Hours and Earnings and are for the UK.

4. Great Britain figures for male and female manual earnings for the years to 2002 can be found in previous editions of the *Review*. Data for those income groups were discontinued in 2003.

5. As figures include employees that were furloughed during the Covid-19 pandemic, the implied rate of wage growth rate for 2020 and 2021 should be treated with caution.
