Sources: See Tables 95 and 97 plus DLUHC (and predecessors) former Live Table 601.

Notes: 1. For the definition of 'tenants new to social housing' and 'tenants new to landlord' see Table 95.

2. Housing association lettings are for general needs housing only and exclude lettings of supported housing. Whereas local authority letting figures include supported housing.

3. The definition of supported housing changed from 2004/05 resulting in a reduction in recorded housing association general needs lettings (see Table 97).

4. With the introduction of the Homelessness Reduction Act, the statutory homeless estimates from 2019/20 onwards include households granted prevention or relief duties (see note 7 of Table 97 for further details).

5. Some of those rehoused as statutory homeless will have previously held a social tenancy.

Sources: DLUHC (and its predecessors) Housing Strategy Statistical Annex (HSSA), Social housing lettings in England, and CORE data from 2011/12.

- Notes:
1. Percentages to 1987/88 are for secure lettings to homeless households only. From 1988/89 they are based on secure and non-secure lettings to reflect the increasing numbers of non-secure lettings made. In 2003/4 some 61 percent of all lettings to new tenants were non-secure in spite of the exclusion of non-secure lettings to homeless households in that year.
  2. Figures refer to both social rent and Affordable Rent general needs lettings to households that did not previously held a local authority or housing association general needs tenancy and exclude supported housing lettings. The definition of supported housing changed for 2004/05, reducing the number of lettings defined as general needs.
  3. With the introduction of the Homelessness Reduction Act from April 2018, those granted prevention or relief duties have been included in the statutory homeless category. Some of those rehoused as statutory homeless will have previously held a social tenancy.
  4. From 2011/12 the percentage figures are based on lettings to new social tenants identifiable in CORE. Consequently these percentages differ from those in table 95, which use LAHS lettings data as the denominator.
  5. CORE lettings data for local authorities are less comprehensive than HSSA and the more recent LAHS. DLUHC weight national but not local authority level data to allow for this. The figures in Table 99a should be quoted if referring to England.
