Sources: Housing and Construction Statistics, Regional Trends, New Earnings Surveys, Scottish Executive, Communities Scotland, Joint Centre for Scottish Housing Research.

Notes: Local authority rents are for the April of each year; rent levels assumed in subsidy calculations refer to the financial year. The housing association assured and fair rent figures from 1990 onwards are derived from the SCORE database and are mean rents inclusive of service charges eligible for housing benefit. They are not, however, entirely comparable with the housing association fair rent figures derived from Housing and Construction Statistics for earlier years. The figures for 2002 relate to the first nine months only; from October 2002 Scottish Secured Tenancies replaced both Fair Rent and Assured, the average of which, from October to December, was £50.30. Earnings figures are average male manual earnings for Scotland. Scottish rent officer statistics for private sector fair rents, and the 'appropriate' rents in housing benefit cases, were not collated for 1994 or 1995. The private fair rents figures for the years to 1993 are for unfurnished lettings only. The fair and market rent figures from 1996 are for all lettings. Private tenancy rents were not available for 2001 and 2002 at the time of compilation.
