Notes: For the years to 1996/97 the useable receipt is the lower of either 25 per cent of the transfer price net of set up costs, or the balance left after the council housing debt and the set up costs have been covered. The net balance is the sum available after the council housing debt and the set up costs and the useable receipt have all been covered. For stock transfers approved by the Department of the Environment following the 1993/94 LSVT Review, a 20 per cent Treasury 'levy' was imposed on the receipt net of the council house debt. The 'levy' was also deducted before calculating the 25 per cent useable receipt. The requirement for a 'levy' was suspended for three years by the 1996 Budget, as was the qualification that the 25 per cent useable receipt required the balance of the receipt to be sufficient to cover the HRA debt. The net balance must first be set aside against any other outstanding council debt (on the 'General Fund'). Any remaining receipt can then also be used for capital investment. For authorities transferring since April 1997 the available HRA debt figures are those at the end of the financial year before transfer, and the useable receipt and net balance figures are therefore only approximate estimates. ERCF supported transfers are not included in the above table. Net balances shown are sums of positive balances only.
