Sources: National Assembly for Wales, Welsh Housing Statistics, Housing and Construction Statistics, Regional Trends, Rent Officer Statistics, New Earnings Surveys, Welsh Federation of Housing Associations.

Notes: The average projected guideline rent for 2006/07 is £49.83. The housing association assured tenancy rents derived from the Welsh 'CORE' data are mean rents net of service charges for the financial year – the Welsh CORE system no longer operates. The housing association fair rent figures are inclusive of service charges and are derived from Housing and Construction Statistics and Rent Officer Statistics. Private market rents are those determined by the rent officer when referred for the purposes of housing benefit. From 1996 onwards these rent figures are affected by the new limits on rents eligible for housing benefit. Earnings figures are average earnings for Wales for all adults in full-time work. Housing association fair rent, and private rent figures for 1998 are for the second quarter of the year. Fair rent figures from 1999 to 2004 were not available, at the time of compilation, because of possible revisions to fair rents following the legal challenge to 'rent capping'. Market rent figures from 2001 were not available at the time of compilation.
