Sources: See Tables 96 & 98.

Notes: From 2003/04 local authority lettings exclude non-secure lettings to homeless households (see Table 96). New housing association tenants include former council tenants transferring to housing associations, but exclude lettings of supported accommodation (and former supported housing tenants taking up general needs tenancies). Similarly new local authority tenants include transfers of former housing association tenants. The definition of supported housing changed from 2004/05 resulting in a reduction in recorded housing association general needs lettings (see Table 98).
