Sources: Answers to Parliamentary Questions 16/7/91 and 2/2/94, Housing Statistics, Cm 2507, Cm 280, Cm 3207 & Cm 3607, CORE websites, DCLG Social Housing Lettings and associated statistical tables.

Notes: Pre-1989/90 lettings figures are Department of the Environment estimates.

Figures from 2011/12 are from Social Housing Lettings Statistics, or CORE. Due to roundings not all figures sum to totals.

Stock figures are for December for years up to 1989/90 and subsequently for the start of the financial year (consistent with UKHR Table 17a).

Lettings figures are for general needs and Affordable Rent, but do not include supported housing.

New housing association tenants include former council tenants transferring to a housing association letting but they exclude former supported housing tenants taking up a general needs tenancy.

Existing social tenants are those that previously held a local authority or housing association general needs tenancy, but this does not include those that were previously in supported housing.

Conversely all new to social renting includes those previously in supported housing.

It should also be noted that some of those rehoused as statutory homeless will have previously held a social tenancy.
