* In previous editions of the *Review*, this was Table 56.

Sources: HM Treasury, Public Expenditure Statistical Analyses 2019 and predecessor volumes.

Notes: 1. Identifiable government expenditure is net of housing capital receipts, which are treated as 'negative expenditure' rather than income.

2. Housing expenditure excludes housing benefit subsidy; but from 2005/06 includes community amenities.

3. In interpreting these figures it should be borne in mind that the scope of public sector activities varies between countries. For example, water supply is a public sector function in Scotland and Northern Ireland, but is in the private sector in England and Wales.
