\* In previous editions of the *Review*, this was Table 83.

Sources: Scottish Homes Investment Bulletin, Scottish Government Annual Affordable Housing Supply Programme Outturn Report and figures provided by Scottish Government, Communities Scotland and Scottish Homes.

Notes: 1. Scottish Government capital grants for local authority new build are reported in Table 81 and are therefore not reported here. However housing association new build funded through TMDF is included.

2. Scottish Government funds for housing association and private development are for both rent and sale schemes. From 2014/15 housing association funds include charitable bond loans.

3. The capital programme excludes public finance from local authorities such as 2nd homes council tax income and commuted sum developer payments. It also excludes programmes specific to GHA.

4. Prior to 1992/93, separate figures for expenditure on private developer and other programmes are not available. Thus both are included in the private developers' figures.

5. Housing association Mid-Market Rent (MMR) and Local Affordable Rent Housing Trust (LAR) expenditure is classified as 'private development' activity.

6. Private Finance (E) for private developers in 2011/12 was unusually high due to large numbers of MMR schemes delivered under the IIF Programme and a large 300-unit private developers' (GRO Grant) scheme.

7. Scottish Government capital spending is recorded in the year in which it is incurred whereas private finance is recorded in the year that the Scottish Government approves the development. Final outturn figures for private finance may differ from initial estimates and may only be paid in subsequent financial years, but figures at approval stage give a good indication of long-term trends.

8. 'Other' expenditure mainly includes central programmes such as the Rural and Islands Housing Fund, and the Infrastructure Fund.

9. Figures exclude finance for Help to Buy and figures for 2018/19 are provisional and subject to revision.
