* In previous editions of the *Review*, this was Table 87.

Sources: Northern Ireland Executive Expenditure Plans and Budgets; NI Department for Communities Housing Statistics and NIHE-supplied figures.

Notes: 1. The reduction in grant to the Northern Ireland Housing Executive (NIHE) in 1989/90 follows some £366 million of NIHE debt being written off. This had a neutral impact on the NIHE programmes.

2. Budget provision for voluntary housing is net of capital receipts, and is adjusted to outturn.

3. NIHE net lending figures from 1997/98 onwards are presented as negative, as receipts and debt repayments exceed planned new investment. Figures from 2015 are not available.

4. Figures for home improvement grants, etc. include grants for housing adaptations, repairs renovation, replacement and home repair but do not include provision for Warm Homes grants.

5. Figures for co-ownership are only available back to 2004/05; in previous years they are included in the voluntary housing figures.
