* In previous editions of the Review, this was Table 105.

Sources: Northern Ireland Department for Communities Housing Statistics Homeless Bulletin and Northern Ireland Housing Executive.

Notes: 1. Allocations figures are for both NIHE and housing association allocations excluding transfers.

2. Homeless legislation was only extended to Northern Ireland in April 1989.

3. Numbers placed in temporary accommodation refer to the total numbers of placements during the course of the year, not the number at the end of the year.

4. From 2011/12, the table reports on homeless applicants 'accepted as full-duty applicants'. Previously, the table reported on applicants 'awarded priority status'. The two terms are essentially the same, but because of changes in management procedures and a greater range of possible outcome decisions than were recorded prior to 2011/12, figures from then onwards for those accepted as full-duty applicants may not be directly comparable with previous figures.
