Notes: 1. The figures relate to placements as at calendar year end and figures may not sum due to rounding. Hostel figures include women's refuges.

2. The term 'homeless at home' refers to households owed a main duty but which remain in the accommodation from which accepted as homeless or make their own arrangements for temporary accommodation.

3. The sharp rise in B&B placements in 2018 is due to local authority improvements in the classification and reporting of shared annexes, which were formerly reported as self-contained provision by some local authorities.

- Notes:
1. All figures are for homeless households in temporary accommodation at calendar year end.
 2. For figures for earlier years (which are for different categories of accommodation) see Welsh Housing Statistics 1997.
 3. Due to legislative and related data collection changes figures for 2015 should be treated with caution.
 4. Figures do not necessarily sum because either because a few cases cannot be assigned to an accommodation category or due to rounding of figures by the Welsh Government.

- Notes:
1. All figures are for homeless households in temporary accommodation as at 31 March each year.
 2. Local authority dwellings include Glasgow Housing Association from 2003 and all other housing associations from 2006.
 3. Figures do not always sum due to rounding by the Scottish Government, especially from 2017.

Notes: 1. Households in accommodation arranged by local authorities pending enquiries or after being accepted as homeless under the Homelessness Reduction Act 2017 and its predecessors.

2. Figures up to and including 2000 relate to placements at the end of each calendar year.

3. Figures from 2004/5 onwards are for placements in the last quarter of the financial year and are grossed up for missing local authority returns on same basis as for Table 90a.

4. Totals may not equal the sum of components because of rounding by MHCLG.

5. Figures for 2018/19 are classed by MHCLG as experimental and are based on the P1E plus the new H-CLIC returns. As they may be subject to some misreporting, caution should therefore be applied when comparing data to previous years.
