Sources: DLUHC (and its predecessors) Local Authority Housing Statistics; Housing Strategy Statistical Appendix, Live Tables 116, 213, 602 and 612; Social Housing Lettings (CORE).

Notes: 1. The dwelling count to 1990 is for December and thereafter the end of the financial year. It includes a small number of dwellings awaiting demolition, sitting outside the HRA or defined as shared ownership. From 1986/87 it also includes dwellings owned by local authorities outside their own area.

2. The all lettings count includes general and supported lets, dwellings let on a social and Affordable Rent basis, secure, introductory or flexible tenancies and lettings to households displaced by slum clearance.

3. Existing lets are lettings to tenants whose previous home was rented from the current local authority or any other social landlord. It includes mutual exchanges but excludes tenancy successions and assignments.

4. New social tenants refer to households who immediately prior to this move did not hold a general tenancy from a social landlord.

5. Prior to 2009/10 lettings data did not differentiate between a new social tenant and a tenant transferring from another social landlord. Tenants new to a landlord therefore combines these two categories for continuity purposes.

6. Changes to the HSSA mean there is some discontinuity between 2008/09 and 2009/10. The reported increase in the number of lettings may not represent a true increase.

7. A change in data collection in 2017/18 means it is no longer possible to identify existing housing associations tenants transferring to a particular local authority landlord.

8. From 2011/12, CORE data for general needs lettings to statutory homeless are used to calculate the share of lettings to homeless but this is known to be an underestimate due to variable CORE completion rates and the inclusion of supported lets in the LAHS denominator.

9. With the introduction of the Homelessness Reduction Act from April 2018, those granted prevention and relief duties have been included in the statutory homeless category. Some of those rehoused as statutory homeless will have previously held a social tenancy.

10. Existing and social lettings do not always sum to total lettings as the lettings category is not always recorded.
