Sources: ONS UK National Accounts, Bank of England Statistics.

Notes: 1. The personal sector includes non-corporate private landlords.

- 2. Net equity is the unencumbered value of household housing wealth. House loans secured on dwellings excludes loans to housing associations.
- 3. There are two breaks in the series of data for the value of private residential dwellings following changes in accounting conventions. A revised series (CGRI) ran from 1987. Data from the old series (ALLN) has been used for earlier years, with minor adjustments to avoid a discontinuity with the new series.
- 4. A further methodological revision was made in 2017, and this provides a new series of data back to 1995.
- 5. A further minor adjustment has been made to the earlier figures, again to avoid a discontinuity with the latest data series, which is the sum of the value of household dwellings and land assets (E46V & E44N).
